

CAPACITY BUILDING ON A GLOBAL SCALE: ABOUT THE PATIENT ADVOCACY LEADERSHIP COLLECTIVE

Co-created with a Global Patient Advisory Board, the Patient Advocacy Leadership Collective is an innovative hub that provides connectivity, community resources, and tools focused on sustainable capacity building for patient advocates globally, subject to local laws, regulations and industry codes.

The mission of the Patient Advocacy Leadership Collective is to support patient advocacy organizations around the world by empowering them with knowledge and skills through offering evidence-based tools and resources that elevate their work in support of patient communities. The platform offers programs and resources focused on supporting the growth, development, and leadership of patient advocacy organizations to deliver upon their mission to support patients and their families. It should be noted that *certain support services under PALC are only available in select regions.*

The Patient Advocacy Leadership Collective Programs

<p>Supporting Organizational Growth</p>	<p>The NextGen Leadership Program is curated by a global faculty of patient advocacy organization leaders, with input from over 170 patient advocates in 35 countries. Courses are focused on building skills in business leadership, communication, and knowledge about public health and research.</p>
<p>Connecting Advocacy Professionals</p>	<p>The Mentor Match Program connects people working in patient advocacy roles for the purposes of establishing a mentoring relationship. Once established, your mentoring relationship will be managed between you and your mentoring partner, independent of this matching service.</p>
<p>Sharing Resources and Knowledge</p>	<p>The Global Health Fellows (GHF) Program* places Pfizer colleagues on skills-sharing assignments with global health organizations to help strengthen local health systems.</p>

The Patient Advocacy Leadership Collective Provides Educational Resources

Supporting Health Literacy with Clear-AI Health Literacy Tool**

Clear-AI Health Literacy Tool is an evidence-based, health literacy tool designed to optimize patient materials for lay audiences. By incorporating health literacy best practices, Clear-AI Health Literacy Tool improves written text by checking readability, understandability, and actionability.

Clear-AI is currently only available for US Patient Advocacy Organizations. [Sign up](#) with the Patient Advocacy Leadership Collective to get updates on when it will be available for your region.
